## DESIGN FOR A CLOCK DIAL

**George J. King, Belmont, Mass., assignor to Chelsea Clock Company, Chelsea, Mass., a corporation of Massachusetts**

**Application March 21, 1935, Serial No. 55,992**

**Term of patent 14 years**

*To all whom it may concern:*

Be it known that I, George J. King, a citizen of the United States and a resident of Belmont, county of Middlesex, and State of Massachusetts, have invented a new, original, and ornamental Design for a Clock Dial, of which the following is a specification, reference being had to the accompanying drawing, forming part thereof.

The figure is a plan view of a clock dial showing my new design, illustrating a twelve-hour timing basis and a twenty-four hour timing basis, together with a colored sector, or sectors,

cross-hatched to simulate red, and properly positioned to visually show the prescribed silent periods in radio broadcasting and with the four-second marks around the outside edge being designed so that a sweep-seconds hand may facilitate sending radio signals.

I claim:

The ornamental design for a clock dial as shown and described.

In witness whereof, I hereunto subscribe my name this 27th day of Feb. 1935.

**GEORGE J. KING.**
